

NOTICE TO CONTAINER TRUCKING COMPANIES

**July 13, 2007
Required Signage on all TLS Licensed Trucks.**

Companies licensed in the TLS truck license system are required and expected to affix permanent, painted or decaled, signage onto the doors of all registered trucks, including the name of the licensed company under which the truck is registered.

Terminal operators who observe trucks with signage that does not include the name of the TLS approved company, for which the truck is registered, will be asked to refuse service to that truck.

Please note; the intent of this requirement is to ensure that all trucks operating on Port property are accounted for under a duly accredited and approved TLS truck license.
